www.linkedin.com/in/oksana-dev

Full Stack Engineer (Frontend-Oriented) with 7+ years of experience building scalable React/Next.js, Vue.js/Nuxt.js applications. Experienced in frontend architecture, performance optimization, BFF development (tRPC), and owning complex product initiatives from design through production. Experienced in building **AI-powered features and integrations with the Anthropic SDK** and leveraging AI-assisted engineering workflows with Claude, Cursor, and GitHub Copilot across planning, implementation, testing, and code review.

WORK EXPERIENCE

Frontend Developer, [Artlist.io](#)

Jul 2022 – Jul 2026

- **Enterprise Lead Qualification flow:** Designed and delivered the frontend architecture for an automated enterprise lead qualification flow, routing high-value users into the enterprise sales pipeline.
- **Enterprise SSO Authentication:** Designed and implemented the frontend and BFF architecture for Enterprise SSO using Next.js, NextAuth, and tRPC.
- Owned enterprise initiatives spanning authentication, billing, analytics, account and lead management, partnering with product, design, backend, and analytics from planning through production.
- **Architected and led migration** of Pricing & Checkout from Blade/PHP to Nuxt.js, improving page load performance by approximately **60%** and modernizing the checkout architecture.
- **Reduced production issues** by **~25%** through standardized validation and centralized observability with Coralogix.

Full Stack Developer, [Y&A](#)

Feb 2021 – Jul 2022

- Implemented a multilingual Flutter application with interactive analytics(Flutter, Riverpod, i18n).
- Developed an enterprise HR dashboard using Vue and ApexCharts(Vue, Buefy, ApexCharts).
- Developed a React-based NFT launcher from Figma designs(React, TypeScript, SCSS, Rest API).

PERSONAL PROJECTS

Jul 2026 – Present

- [/dev/burnout](#) – Browser-based strategy game (Next.js, TypeScript, Zustand, Zod). Designed a five-metric game balance system, validated via a Python Monte Carlo simulator (3,000 runs/policy). *In active development.*
- Data visualization dashboard · Next.js, tRPC, TanStack Virtual, MUI, Vercel, CRON jobs, TanStack Query, Table & Virtual – production-grade virtualization (**170k+ rows**)

SKILLS

Frontend: React, Next.js, Vue, Nuxt.js, TypeScript, Tailwind, Zustand, TanStack (Query, Table, etc), Flutter, React Native

Backend/Infra: Node.js, tRPC, Nest.js, REST API, Fast API, BFF Architecture, Zod, SSE

AI-Assisted Development: Cursor, Claude, Codex, GitHub Copilot, Gemini, Gemma, Ollama, Anthropic SDK

Tools & Platforms: Storybook, Coralogix, Figma, MixPanel, Harness, Sentry

EDUCATION AND CERTIFICATIONS

University of the People - Associate Degree in Computer Science

She-codes; - Frontend Web course Nov 2018-Feb 2019;

Udacity-Google Scholarship - Frontend Web Course Nov 2017-Feb 2018
